KEEPING FUTURE CHAMPIONS IN TOP FORM

From collection through to training and race day, it is the manager's responsibility to keep racing pigeons in super form and give them the best chance of reaching the finish line.

BLUE N°1 has been developed to serve the needs of OLR from beginning to end.

TRANSPORT

With pigeons being received from all over the world, and the risks of the rapid spread of different viruses, managers can rely on BLUE N°1 as a first line defence to start treating the pigeons immediately from collection. BLUE N°1 may lower many forms of bacteria and improve nutrient absorption so the pigeons may become healthier and stronger day by day.

TRAINING

The intense pressures of OLR training can quickly exhaust under-par pigeons and disrupt schedules. BLUE N°1 has been formulated to possibly help to create more resilient pigeons who might have faster recovery times and better overall health.

TROPHIES

OLR is all about winning! See more pigeons race fast the finish line when you invest in the use of BLUE No.1 as a powerful daily treatment.

A WORLDWIDE FIRST - DESIGNED WITH OLR IN MIND

BLUE N°1 is the first and ONLY all-in-one 'super supplement' developed specifically for the needs for racing pigeons of One Loft Races.

The formula - which has been 2 years in testing and development - breaks new ground in terms of ease of use and administration, the potentially rapid results for young pigeons and the cost effectiveness for OLR management.

With just ONE powerful solution, mixed daily into water or feed - you may see multiple benefits within just a few days. Your racing pigeons can be much healthier, more resilient and more vibrant than when they first arrived. Reoccurrence of illness might also much more likely be reduced. BLUE N°1 will free up your time as a manager, to stop worrying about your pigeons.
